

A TEAM LEADER YOU CAN TRUST

Leo Rumschlag, PE, is a registered Professional Engineer and Bridge Inspection Team Leader with over 40 years of bridge inspection, bridge management, bridge design, and project management experience for large and small transportation improvement projects.

Leo has inspected over 1,000 county bridges.

He fully understands and is well versed in all INDOT bridge inspection and reporting procedures. He has a proven track record of successfully performing bridge inspections and gaining Inspection Report approvals from INDOT.

Leo has an excellent working relationship with the entire INDOT bridge inspection staff. Leo will be responsible for all aspects of JSE Bridge Inspection work, including the coordination of task orders with all team members, perform complex, fracture-critical, and special inspection fieldwork. **Leo's focus is always on value, bringing advice and solutions to Indiana Counties concerning their bridge programs.**

Since 1978, JSE has excelled in our ability to provide transportation design solutions for complicated road and bridge construction projects. Our services include:

STRUCTURAL

- Bridge Design (Prestressed Concrete, Structural Steel)
- Complex Bridge Design (Post Tensioned Concrete, Cable Stay, Concrete Segmental, Steel)
- Construction Engineering (Falsework and Shoring, Bridge Demolition)
- Construction Sequencing & Erection (Cofferdams)
- Construction Inspection (Road and Bridge)

TRANSPORTATION

- Road / Traffic Design
- Hydraulic Design
- Utility Coordination

JSE IS YOUR BRIDGE INSPECTION EXPERT

Indiana Toll Road (73 mi.) This project required 68 bridges to be inspected in order to generate a durability report, serving as the scope document for which final plans were developed. All structures were required to meet minimum performance criteria defined by the owner.

Post-construction, JSE performed the bi-annual inspection and load rating of all 68 bridges included in this project.
